

I am a Continental Airlines frequent flyer and member of its Presidents Club. I support Continental's Petition to the FCC. I want Continental to be able to continue to provide its own wireless service to me and other members at Boston Logan and other airports, which is a free service.

I am an engineer in this field. MASSPORT has no reason to complain other than they want to exclusive rights in the entire airport. That is absurd. American uses T-Mobile hot spots all over the place, too. There is no reason why independant networks can't coexist in 802.11B space. There are 11 channels and three different networks can operate at the same time at the same place with adequate channel separation. They will not affect eachother.

I rely on Continental's 802.11B service wherever I fly. This is critical to my business needs. This service is part of the President's Club and one of the reasons why I became a lifetime member of this service. Thank you for ensuring the right of the public to use the wireless service of its choice. MASSPORT has no reason to complain other than pure greed.
